TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Biologist *LK*

RE: Site Inspection, Bonneville Quarries, Inc, Dove Creek Quarry, M/003/016, Box Elder County, Utah

Date of Inspection: September 17, 2003
Time of Inspection: 8:00 am.
Conditions: Cloudy, cold, intermittent snow
Participants: Lynn Kunzler, DOGM

Purpose of Inspection: To witness reclamation of disturbance around the spring area.

Observations:

Reclamation activities were scheduled for this day to mitigate disturbances to the spring area along the access to the vertical cloud pit. However, recent storms in the area delayed this work.

The site quarry has been active in recent days, with several pieces of equipment on site (there was no activity during this inspection). Observations made of the site did not identify any non-compliance problems.

Several photos were taken to document site conditions.

Conclusions and Recommendations:

Continue to monitor this operation as needed or requested.

(NOTE: Reclamation of the spring area occurred the next day. Forest Service personnel monitored this work to assure additional cultural resources in the spring area were not disturbed.)
